INTERWRITE™

INTERACTIVE CLASSROOM

SOLUTIONS

The Focal Point of the Interactive Classroom

Interwrite™ Workspace Software is an interactive software program designed to be used with the Interwrite™ Board, Pad and Panel. Available in Windows®, Mac® and Linux, it contains interactive content and resources for many subject areas including Math, Science, Geography, Language Arts, and much more. Choose from hundreds of Interwrite Lessons, all of which are aligned to state standards, or design your own with the interactive tools available to you in Interwrite Workspace Software.

Teach from the Front of the Classroom

Interwrite™ Board is a durable and easy-to-use interactive whiteboard that comes complete with our Interwrite Workspace Software. The Interwrite Board, available with a Bluetooth® wireless connection, keeps your students focused on the lesson at the front of the classroom. Kids love going to the board to answer questions when they have an Interwrite Board in their classroom.

Teach from Anywhere in the Classroom

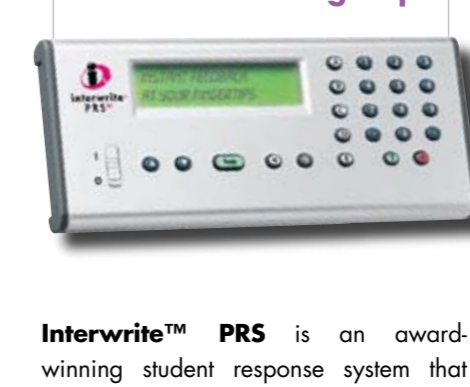

Interwrite™ Pad is the original Bluetooth wireless pad for the interactive classroom. Teachers can project their lessons onto the Interwrite Board or any surface to create an interactive whiteboard environment. Teachers love the freedom of being able to use Interwrite Workspace Software and interact with their lesson from their Interwrite Pad from anywhere in the classroom. We have the patent and tons of industry awards to prove there is nothing like it!

Interact Directly on the Screen

Interwrite™ Panel combines the advantages of an LCD monitor with the simplicity of using a pen-input device. Whether you are teaching from your podium using Interwrite Workspace Software or demonstrating an education software program in your computer lab, the Interwrite Panel enables you to interact and annotate while constantly facing your students.

Instant Feedback at Your Fingertips

Interwrite™ PRS is an award-winning student response system that combines interaction and assessment to improve learning outcomes. No child is left behind when they can participate by answering questions with a simple click of a button. Choose from our infrared or radio-frequency PRS clicker, or our new Virtual PRS system. Don't wait until the final exam to see what your students understand. The answers are at your fingertips...actually, at their fingertips.

Training and Support for your Interactive Classroom

Interwrite™ Professional Development – Who's best at training customers on our Interwrite Interactive Classroom solutions? Teachers, of course! Our staff of trainers are all former school teachers with a unique perspective on how to use our solutions in a classroom. We offer free tech support, online training videos, and live training via Internet conferencing for our teachers around the world. We can also customize a training solution that is delivered onsite at your school.
