7 Laser Bar Code Scanners

Through a strategic alliance Smead will offer Microvision's Flic Laser Bar Code Scanner, under the Smead brand, to medium and large businesses through its network of resellers. Smead will introduce a private label version of Microvision's Flic barcode scanner integrated with their Smeadlink File Room product, an application for tracking physical files and documents in both a centralized and decentralized filing environment.

8 Philips Digital Pocket Memo 9450 VC

Royal Philips Electronics' new Digital Pocket Memo 9450 VC with Voice Command allows users to assign patient/client or work type codes to a dictation by simply speaking them. This feature allows marking of dictation files for better identification, transcription and archiving later in the workflow process. Users can assign up to five different ID numbers to a dictation file; recharge via USB; change a storage mode; or use the 32 MB memory card that is included.

10 Moisture-Proof Roll-Up Lighted Keyboard

The Manhattan "FireFly" Moisture-Proof Roll-Up Lighted Keyboard is designed for low-light or moisture-prone environments. EL technology produces a soft glow that highlights the lettering on each key, through a translucent cap, for visibility and minimum eyestrain. A thermoplastic polyurethane casing resists most acids and solvents and features a slim form factor (508 x 145 x 13mm), 104 full-sized, quiet-action keys and Windows compatibility.

11 Interactive Meetings

The Bluetooth wireless InterWrite MeetingPad lets any meeting participant contribute to the presentation—from anywhere in the room. With the MeetingPad, anyone in the room can interact with the presentation just as if they were standing at the MeetingBoard, including making annotations and having full mouse control. The MeetingPad can be passed around the room to engage the audience, and up to seven MeetingPads can be active at one time, making it the perfect collaboration device.
