LCD CROSSOVER PROJECTOR

The Epson PowerLite S3 is an LCD-based projector for office, classroom and crossover home environments. This 5.6-pound model can output 1,600 ANSI lumens of brightness with native SVGA resolution. When powering up, the S3 features a verification tone and a projected image appears within five seconds. The PowerLite S3 can be unplugged immediately after use, as the "Instant Off" function continues to cool the unit even after it has been turned off. Price: \$899.

What adding Interaction to your next presentation should cost you

Everyone knows the most memorable meetings and effective training sessions share a common element: a heightened level of audience or student involvement. In short, *interaction*.

But not everyone knows that with wireless Reply® systems, you can realize new heights of audience involvement at a cost that's sure to get a nice reaction from your boss, too.

We have multiple wireless Reply system options to choose from. Each uses radio signals (not cumbersome wires or limited infrared technology), is quick to set up, remarkably easy to use and surprisingly affordable.

Give us a call. Let's interact.
